Spiritual Living • Religious Thought

Thomas D. Williams  
**The World As It Could Be**  
*Catholic Social Thought for a New Generation*

*The World as It Could Be* is a fascinating analysis of the state of contemporary Catholic social thought—what it means, how it has developed, and how it can meet the pressing new demands of our rapidly changing world. Fr. Thomas Williams, professor of theology and ethics in Rome and the Vatican analyst for CBS News, examines the essential contours of Catholic social thought in the 21st century. Addressing many of the critical topics of our day, Williams lays out the challenges that face us whenever we try to balance competing demands—such as individual rights and community needs—in the light of the Gospel and the Church's social tradition.

Brennan Pursell  
**History in His Hands**  
*A Christian Narrative of the West*

Most professional historians write history as though God either does not exist or doesn't matter. *History in His Hands* offers a radically different approach. Brennan Pursell, Harvard-trained historian and author of *Benedict of Bavaria*, shows how God's directing hand ensures that history—and each person in history—has significance. We can discover the difference that God's presence makes in several key issues in human history: time, space, war and peace, wealth and poverty, and human love and hatred.
